Katastrofični događaji na galaktičkoj skali

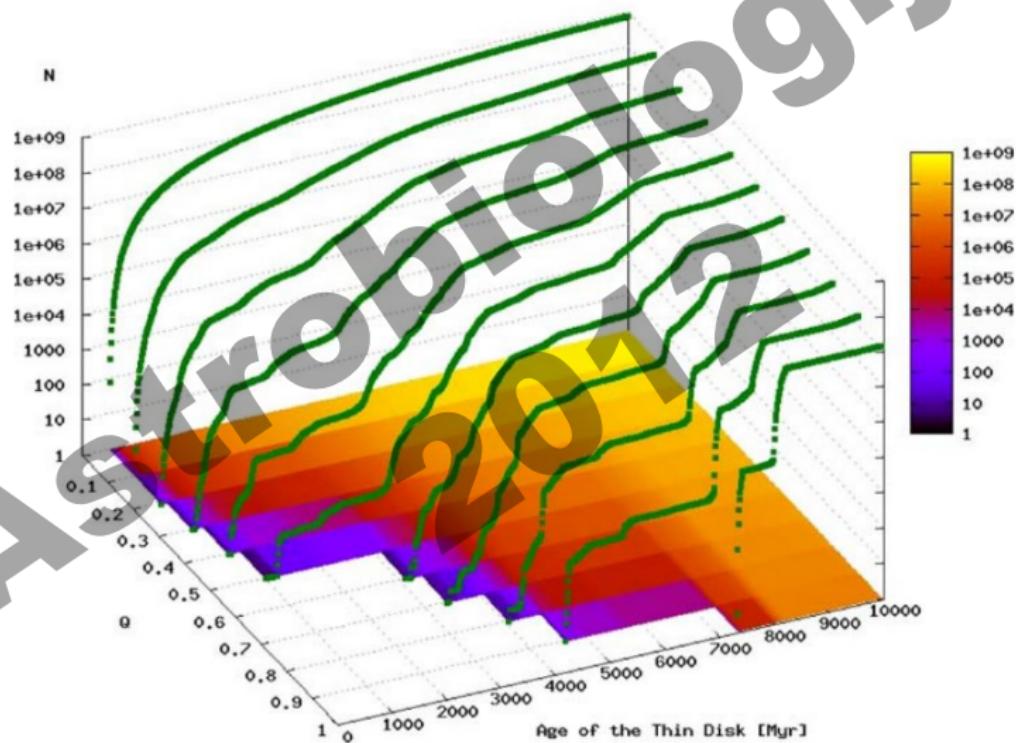

- γ -bleskovi:
 - Annis J, 1999, JBIS, 52, 19.
 - Scalo, J., Wheeler, J.C., 2002, ApJ, 566, 723.
 - Thomas, B.C. et al, 2005, ApJ, 634, 509.
- Supernove
- Sudari zvezda

Bitno za nastanjivost

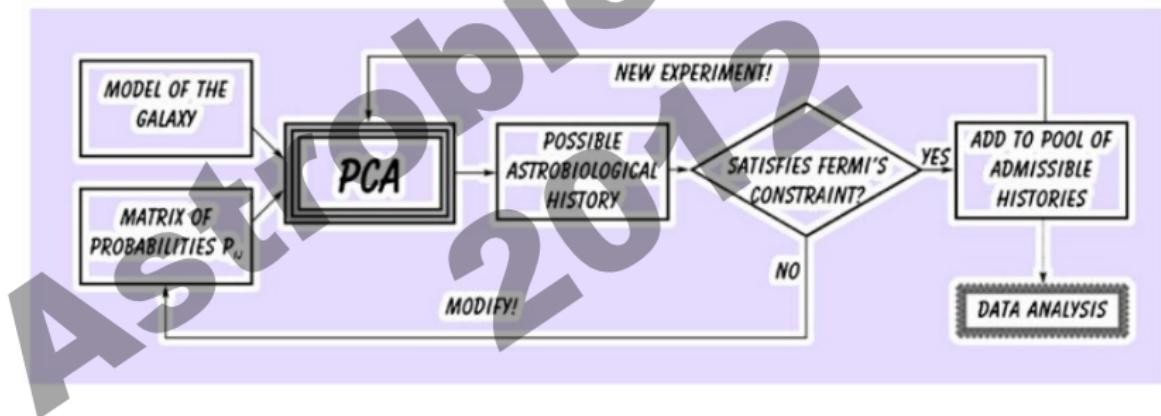

- Preduslovi: Masa zvezde ($M_?$), Metaličnost. Statistika misija kao što je Kepler je veoma važna za bolje razumevanje, takođe modeli formiranja planetskih sistema, itd.
- Funkcija rizika (po prirodi rizika)
 - Globalne: ...
 - Lokalne: ...
 - Unutrašnje: ...

Primer korelisanja vremenske skale

Način modeliranja

Napraviti modele koji uključuju što više parametara i ispitati parametarski prostor...

Veoma kraaaaaatak uvod u EĆA

Uređena četvorka: $\{G, S, N, F\}$

$$f : S^{2r+1} \rightarrow S,$$

$$|F| = m^{m^{2r+1}}.$$

$$s_i^{(t)} = F(s_{i-r}^{(t-1)}, s_{i-r+1}^{(t-1)}, \dots, s_{i+r-1}^{(t-1)}, s_{i+r}^{(t-1)}).$$

$$s_i^{(t)} = F(s_{i-r}^{(t-1)}, s_{i-r+1}^{(t-1)}, \dots, s_{i+r-1}^{(t-1)}, s_{i+r}^{(t-1)},$$

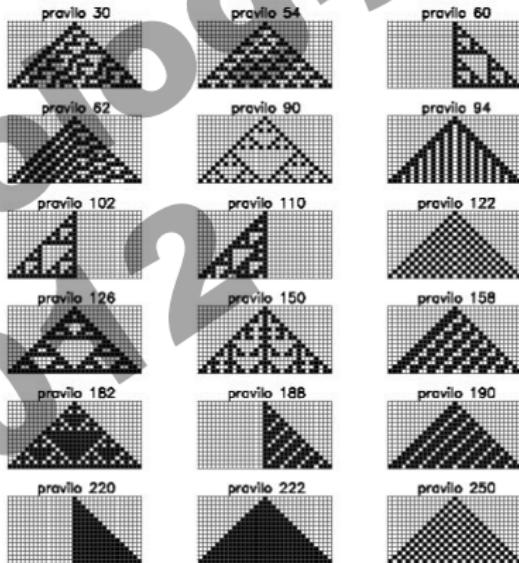

$$s_{i-r}^{(t-2)}, s_{i-r+1}^{(t-2)}, \dots, s_{i+r-1}^{(t-2)}, s_{i+r}^{(t-2)},$$

$$\vdots$$

$$s_{i-r}^{(t-n+1)}, s_{i-r+1}^{(t-n+1)}, \dots, s_{i+r-1}^{(t-n+1)}, s_{i+r}^{(t-n+1)},$$

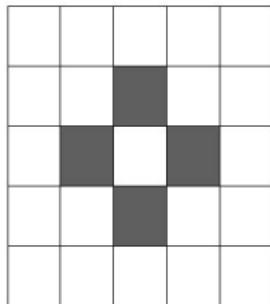

$$s_{i-r}^{(t-n)}, s_{i-r+1}^{(t-n)}, \dots, s_{i+r-1}^{(t-n)}, s_{i+r}^{(t-n)})$$

Tajni plan...

- Podesiti i izvršiti GADGET simulacije za galaksiju nalik Mlečnom Putu.
- Učitavanje međustanja.
- Izračunati bitne podatke o česticama (unutrašnji faktori nastanljivosti) i prostorne faktore (spoljašnji faktori nastanljivosti).
- Praćenje čestica kroz grid i izračunavanje nastanljivosti čestica.
- Prikaz rezultata.
